

CONCRETE TRUCK CLEANER

Limpiador De Concreto De Camiones

DESCRIPTION:

This product was developed first, with safety in mind for the people using it, and second for the safety of the surfaces being cleaned. This product is very unique in the fact that the acid used in it has been buffered. This means that it has very little odor and no harmful vapor. At the same time it has no harmful effect on human skin or the painted surfaces on concrete trucks. Even though this product has been found to be safe to the users, at the same time it also has the benefit of being a very aggressive concrete truck cleaner without the harmful vapor and damage to your expensive equipment.

PRECAUTION: AL USARIO: Si usted no lee Ingles, no use este producto, hasta que la etiqueta le haya sido explicada ampliamente.

TO THE USER: If you cannot read English, do not use this product until this label has been fully explained to you.

DIRECTIONS:

This product was developed for the removal of hardened concrete from handling equipment such as bulk cement haulers, redi-mix equipment, concrete mixers and in concrete manufacturing plants. It may be diluted with up to 4 parts water for most jobs. On heavy build-ups, dilute 1 to 2 with water. After determining the proper strength, the solution is applied to the surfaces to be cleaned. **NOTE:** For optimum safety and protection to personnel, always wear protective clothing and equipment during application procedure.

CAUTIONS:

CORROSIVE: Product contains buffered hydrochloric acid. Do not ingest. If this does occur drink large quantities of water followed by milk of magnesia or a solution of water and baking soda. Follow with water beaten with egg whites or vegetable oil. Call a physician immediately. For eye contact, flush with water for 15 minutes. Get prompt medical attention. For skin contact, wash area with soap and water. Use appropriate safety equipment during application. Triple rinse empty container before disposal in an
