ADVANTAGES OF FOAM

Contact time maximizes chemistry's effectiveness

Visual marker for equipment operator

Expansion rates reduce water and chemical usage

Reduces labor costs

High Concentrate **Wall Foamer**

SPECIFICATIONS

50 feet of foam hose

30 gallons of foam per minute

Capable of 1:1 to 9:1 dilution ratios

Up to 25 feet of foam distance

FI-WC-11AP

This unit is capable of up to 1 to 1 dilution ratios, based on the viscosity of the concentrate product. This wall mount unit eliminates the possibility of water pressure variations by regulating the incoming water pressure and boosting it to the desired water pressure level. Consistent water pressure allows the system to produce an accurate chemical dilution level at all times to ensure foam consistency.
